## COFEMO INDUSTRIE NEWS N°7

DECEMBER 2012

*Online newsletter periodically informing our commercial partners about Cofemo Industrie srl news and events.*

### COMPANY

### Slight production growth during the last 2012 months

Cofemo industrie have been experiencing a positive trend since early 2012. The budget data show a slight increase compared to 2011 and the last months of 2012 saw a rise in order intake.

This was achieved thanks to the success of the new tools and products exhibited at the Orgatec show, where they were appreciated for both quality and innovation, which always distinguish Cofemo Industrie production.

### ENVIRONMENT

### Certification ISO 14001

Within the environmental policy that Cofemo is pursuing, we can officially announce that the certification ISO14001 has been obtained. This new step follows the AIA certificate already obtained last year. This important acknowledgment is the result of a continuous improvement job in the last years, both in the monitoring of the main parameters of environmental impact and their optimization. Particularly the industrial water loop is now closed with full reduction of thermic energy and recirculation of water for industrial processes, the energy consumption of the transformation processes of the products has been reduced thanks to new investments in the machinery and the smoke and dust filtering and reduction has been completely renewed to the state of the art. Cofemo keeps going with this policy involving also subcontractors. From today products and processes of Cofemo brings to its customers another added value of international certification of environmental excellence.

### SALES

### Sense - a new mechanism

SENSE is the new weight sensitive mechanism of Cofemo Industrie. It is a weight activated control conceived and designed to offer a comfortable seating without any adjustment.

SENSE has an essential design, is customizable and compact (79 mm from the cone to top of the fixing plate) and offers 5 different back inclinations (21° max) in addition to the fixed upright position.

SENSE complies with the BIFMA and EN standards.

### PRODUCTION

### Plastic injection plant

The new in house plastic thermo-injection plant offered by Cofemo Industrie is highly appreciated by our customers thanks to the very good design and quality level offered for both large and complex components.

### COMMUNICATION

### Best wishes!

Everyone at Cofemo Industrie would like to wish you all a Merry Christmas, and a prosperous and successful Happy New Year for 2013.
