

## COFEMO INDUSTRIE NEWS

MARCH 2019

LISTO 153x200 mm with adjustment and slide

LISTO 153x150 mm without adjustment

### New LISTO automatic mechanism

**Co.fe.mo Industrie**, - one of the most important leading company in the production of office furniture components - following the success of the newest synchro automatic mechanism **LISTO**, now launches its restyling on the market, having made it more compact and cleaner in its aesthetic lines.

**LISTO** is a mechanism with a contemporary and essential design, easy to use, functional and ergonomic.

**LISTO** allows to maintain an optimal lumbar contact during the tilt (19° of the backrest travel): automatically adapting the backrest response to the chair user, the legs lift is extremely reduced; in this way the user is accompanied and perfectly balanced during the chair tilting.

**LISTO** is available in the version with fixing plate **153x150 MM** or **153x200 MM**; options are the fine tension adjustment knob - to optimize its use - and the seat depth adjustment.

Thanks to its small size and extreme versatility, **LISTO** mechanism lends itself to a series of customizations (integrated into the seat, activated by cables, etc.) according to the client's functional and aesthetic needs, and has already been chosen by different designers and companies as heart of the project of new chairs.

### Co.fe.mo Industrie and the trend of the market in 2018

2018 represented for **Co.fe.mo Industrie** a year of consolidation of important milestones: new projects with customers of primary importance, positive responses from the market regarding the new presented products, growth in turnover, employment of new human resources in order to guarantee a reliable and qualified level of service and quick response time.

Thanks to all our customers, suppliers, and collaborators for the excellent work done and the precious cooperation over the years.

### Orgatec Fair in Cologne

**Orgatec** (held in October 2018 in Cologne, Germany) has represented for **Co.fe.mo Industrie** a moment of great success on the international market: our aluminum and plastic components (with a high qualitative and aesthetic niveau) have been introduced by our customers in their new collections, immediately obtaining a highly appreciated feedback.

The contribution of **Co.fe.mo** on new projects has been decisive both in terms of co-design and actual production of the components themselves, such as chair kits, integrated mechanisms in the seats, new chair shells, new bases etc.

**Orgatec 2018**: an event full of satisfaction both for our customers and for **Co.fe.mo** staff, which indeed acts as decisive part in the constant growth of our worldwide reality.
